

OUTPUT

1. Main Page – Breaking News Section:

The **Main Page** of the Online Newspaper platform(PEC NEWS) serves as the primary landing page, displaying the latest breaking news articles across various categories such as General, Business, Sports, Technology, and Entertainment.

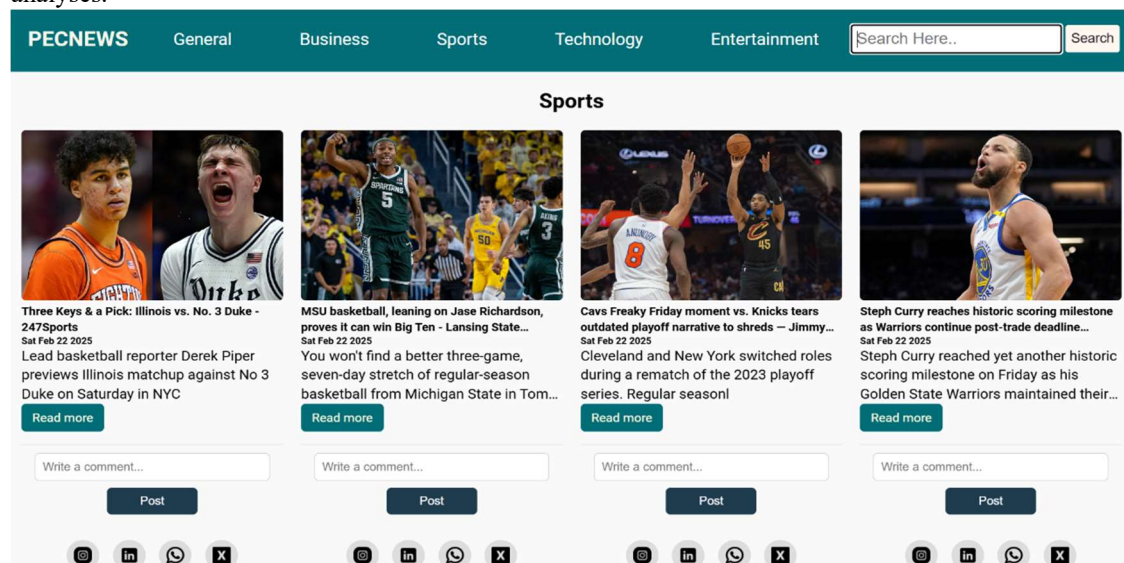

Key Features:

- **Navigation Bar:** Users can switch between different news categories using the top menu.
- **Search Functionality:** A search bar in the top-right corner allows users to find articles quickly.
- **News Cards:** Each article is presented in a card layout with an **image, headline, date, brief summary, and a "Read More" button** for full details.
- **Comment Section:** Users can **post comments** directly under each article.
- **Social Media Sharing:** Below each article, there are buttons to share content on platforms like **Instagram, LinkedIn, WhatsApp, and X (Twitter)**.

2. Sports Tab - Sports News Section:

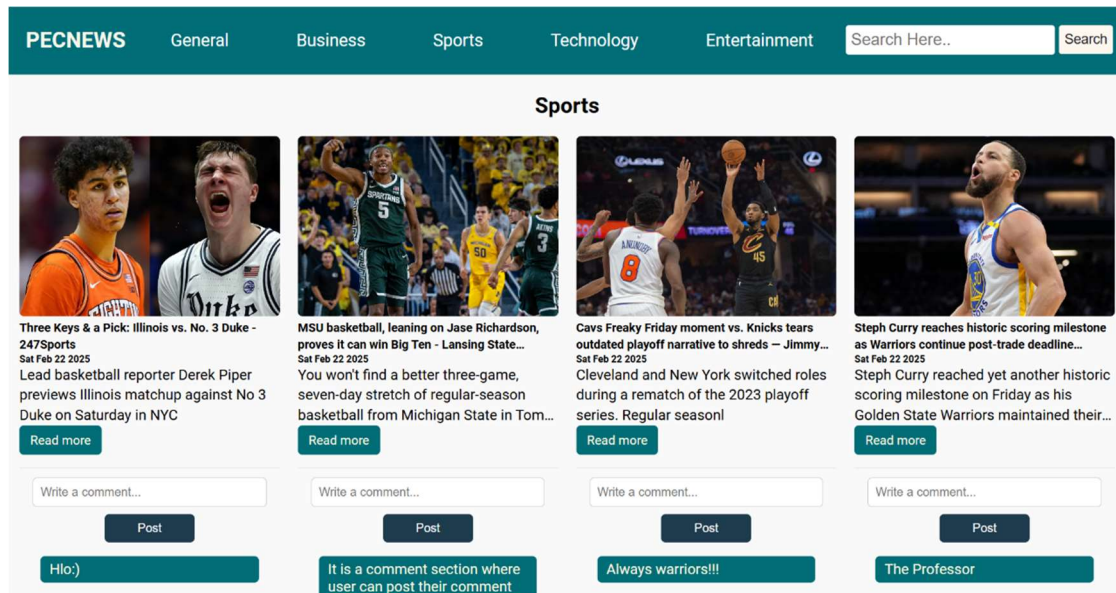

The **Sports Tab** on this platform provides users with the latest updates, insights, and highlights from the world of sports. This section is dedicated to covering various sporting events, player performances, and game analyses.

OUTPUT

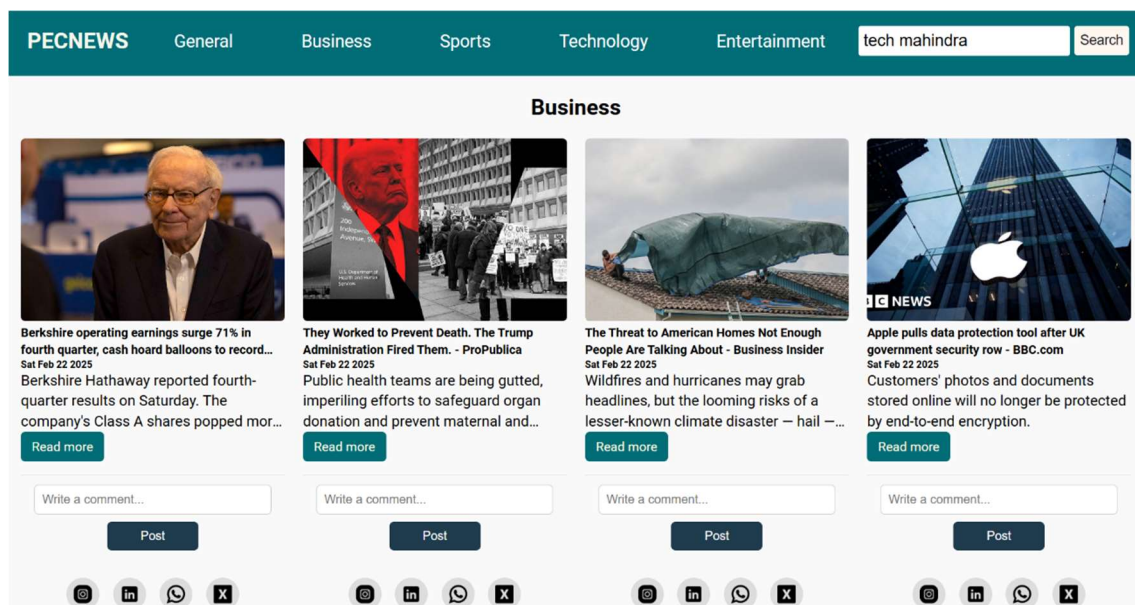

3. Comment Section - User Interaction:

The **comment section** of this platform allows users to engage with news articles by sharing their thoughts and opinions. Users can enter their comments in the provided input box and post them by clicking the "Post" button. The posted comments are displayed below the respective articles, encouraging discussions and user engagement. This feature enhances interactivity, making the platform more dynamic and engaging for readers.

4. Search Field - User Query:

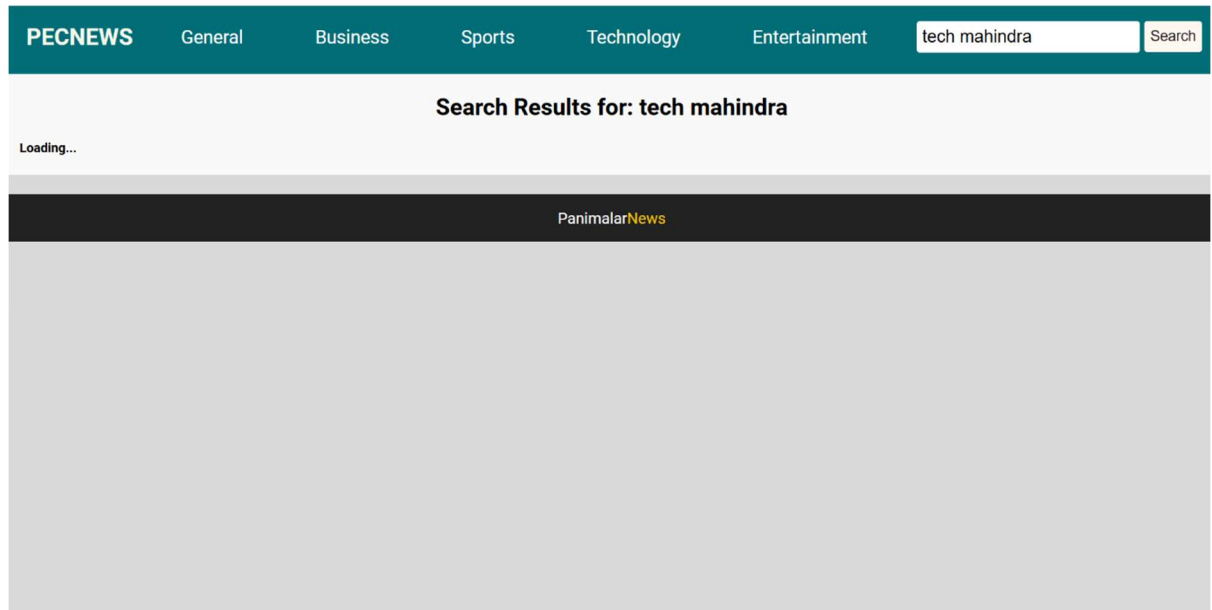

The **search field** allows users to find news articles dynamically by entering keywords. It helps in quickly locating relevant content across different categories like Business, Sports, Technology, and Entertainment. Here, I typed the "Tech Mahindra" keyword.

OUTPUT

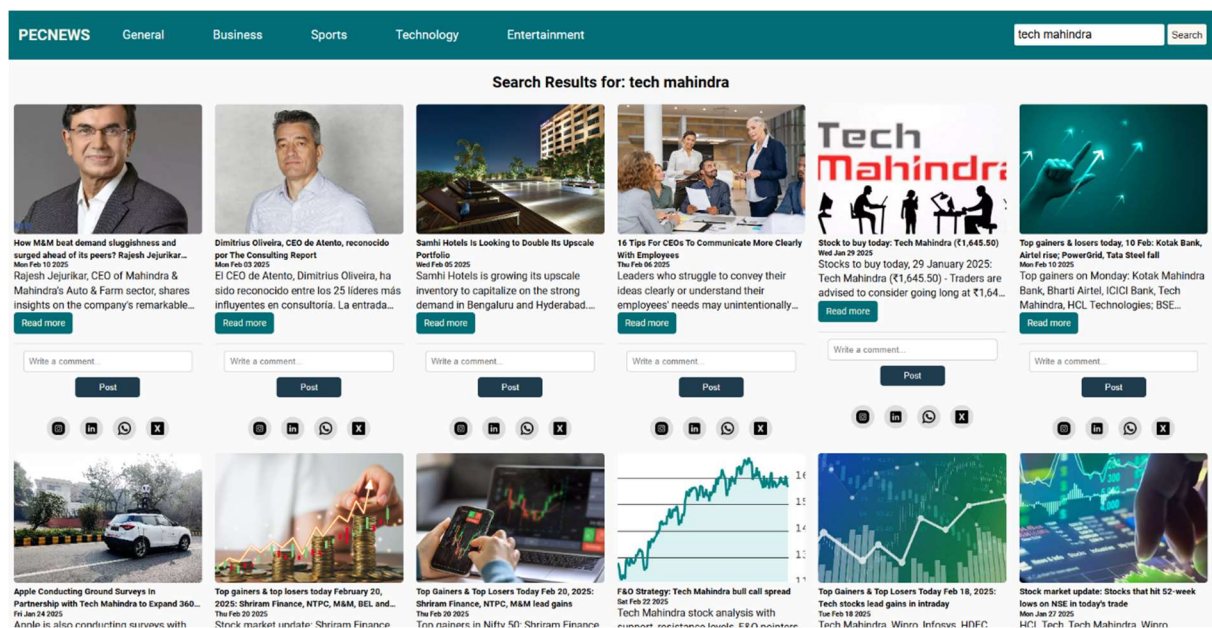

5. Search Field - Processing:

The **search field** allows users to find relevant news articles based on their input. Here, I typed the "**Tech Mahindra**" keyword. The system is currently loading the search results.

6. Search Field – Result:

The **search field** retrieves news articles related to the entered keyword. Here, I typed "**Tech Mahindra**", and the system displayed relevant articles, including stock market updates, business insights, and company-related news.

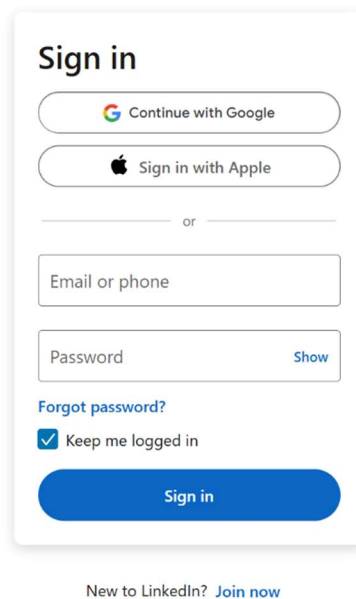

OUTPUT

7. Social Media Sharing Feature:

The **Social Media Sharing** feature allows users to share news articles on various social media platforms. Each article includes social media icons, which users can click to share the content directly on platforms such as LinkedIn, WhatsApp, Instagram, and X (formerly Twitter).

Upon clicking a social media icon, users are redirected to the respective platform with the article's link preloaded for sharing. This feature enables easy content distribution and engagement, allowing users to share important news with their network. **Example:** If a user clicks the LinkedIn share button, they are redirected to LinkedIn's sharing page.

A screenshot of the LinkedIn mobile app sign-in screen. The screen is white with a blue header. The title "Sign in" is in bold black text. Below the title are two rounded rectangular buttons: "Continue with Google" with the Google logo and "Sign in with Apple" with the Apple logo. Below these is a horizontal line with the word "or" in the center. Underneath is a text input field labeled "Email or phone". Below that is a password input field labeled "Password" with a blue "Show" link to its right. Below the password field is a blue link "Forgot password?". Below that is a checkbox labeled "Keep me logged in" which is checked. At the bottom is a large blue rounded rectangular button labeled "Sign in". At the very bottom of the screen, there is a link "New to LinkedIn? Join now".

8. Responsive-Design:

The **Responsive Design** ensures that the website adapts seamlessly to different screen sizes, providing an optimal viewing experience across mobile phones, tablets, and desktops. The layout dynamically adjusts based on the device's screen width, ensuring readability, accessibility, and ease of navigation.

Elements such as **images, text, buttons, comment sections, search queries, and social media sharing** features resize and reposition accordingly to maintain a clean and structured appearance. The design approach enhances user engagement by offering a smooth and consistent experience, regardless of the device being used.

Here, I have attached the pictures of the mobile device view.
